

Wake Up To Manufacturing

Breakfast. Insights. Solutions. Community.

Wake Up to Manufacturing is your monthly opportunity to connect with fellow industry professionals and walk away with real ideas you can bring back to your facility.

Each month, three speakers address the challenges that matter most to manufacturers right now. These are not outside consultants; they are manufacturers just like you who have faced the same struggles and found ways to push through. Following the presentations, an open Q&A roundtable sparks the kind of conversation that leads to new ideas, new partnerships, and real solutions.
